

## **SILICON STUDIO ANNOUNCE *YEBIS 2* MIDDLEWARE FOR XBOX ONE**

*YEBIS 2 Provides Next-Gen Post-Processing Solutions for All  
Next-Gen Platforms*

**Tokyo, Japan – May 23, 2013** – Silicon Studio©, a high-end middleware provider and game developer, announced today that their next-gen post-rendering middleware solution, ***YEBIS 2***, is now available on Xbox ONE, the all-in-one games and entertainment system from Microsoft. ***YEBIS 2*** is a middleware with the power to create stunning visual effects for current and next-gen development, offering developers an easy way to deliver high-quality visuals and effects with seamless integration.

Physically based optical simulation of Depth-of-Field and bokeh effects

HDR rendering in FullHD (1080p)

“Silicon Studio has been on the bleeding-edge of middleware development,” said Mr. Takehiko Terada, CEO, Silicon Studio, “Our partnership with Microsoft is going to result in groundbreaking games for the generation ahead.”

**YEBIS 2** is an effective tool for both large scale game productions as well as small indie teams. **YEBIS 2** is an extremely powerful, making it a compelling solution for developers looking to deliver high quality visual effects on the new Xbox One console. Silicon Studio is proud to be collaborating with Microsoft on providing developers high-end tools for next-gen game development.

**YEBIS 2** is the world's only middleware with multi-color customizable glare effects, depth of field effects, motion blur, bokeh, and more. **YEBIS 2** provides various high-quality lens effects which can be used on a broad range of development platforms including Xbox One.

A trailer of **YEBIS 2** showing off the glare, lens flare, and other visual effects can be seen here:
