

## **YEBIS 2 UPDATED FOR SONY'S DEVNET AND MICROSOFT'S GAME DEVELOPER NETWORK PORTAL FOR NEXT GENERATION SYSTEMS**

*YEBIS 2 Developer Package Available for Download,  
Including Trial Version, Guides, Assets, and More – Free  
For Developers*

**Tokyo, Japan – June 24, 2013** – Silicon Studio, a high-end middleware provider and game developer announced today that the post-processing middleware solution, **YEBIS 2**, is officially incorporated into Sony's Devnet developer service and Microsoft's Game Developer Network Portal for development teams working with the PlayStation® 4 and Xbox One®. YEBIS 2 is now available to download as a free trial, and any developers looking to craft a game with powerful lens-simulation effects can download the "**YEBIS 2 Developer Package**"

here: [www.siliconstudio.co.jp/middleware/yebis/en/trial/download/](http://www.siliconstudio.co.jp/middleware/yebis/en/trial/download/)

Included in the package is:

- **YEBIS 2** trial software and product guide
- **YEBIS 2** screenshots
- **YEBIS 2** fact sheet
- **YEBIS 2** trailer

**YEBIS 2** is a post-processing solution with the power to create stunning visual effects for next-gen development while offering current gen developers the ability to deliver high-quality visuals and lens-simulation effects. **YEBIS 2** is an effective tool for both large scale game productions as well as small indie teams. **YEBIS 2** is the world's only middleware with multi-color customizable glare, depth of field,

motion blur, bokeh effects, and more. The software provides various high-quality lens effects which are scalable based upon the platform that the game is being created.

A trailer of **YEBIS 2** showing off the glare, lens flare, and other visual effects can be seen here: [www.youtube.com/watch?v=52ojtk9N5yo](http://www.youtube.com/watch?v=52ojtk9N5yo)

**YEBIS 2** is utilized in Square Enix's *Agni`s Philosophy* tech demo, (showcasing next-gen game development on the PlayStation® 4 and Xbox One®.) **YEBIS 2** is a foundational middleware solution for high-end next-gen gaming.
