Popular online MMO "Black Desert" developed by Pearl Abyss (S. Korea) announces full adoption of Silicon Studio post effect technology

TOKYO, JAPAN – December 8, 2016 – Middleware and game development company, Silicon Studio, is happy to announce the full adoption of its post effects technology YEBIS by "Black Desert", the hit MMORPG from game developer Pearl Abyss Inc. (HQ: Gyeonggiz Province (Kyunggido), Korea. CEO: Jung KyoungIn).

Official comment from Pearl Abyss:

"By collaborating with Silicon Studio, we have been able to realize fantastic realistic graphics that make it possible to raise the user experience one step higher."

Pearl Abyss : Jung-KyoungIn, CEO

About "Black Desert" Online

"Black Desert" is a 3D MMORPG set in medieval fantasy world where players set off on adventure to uncover the mysteries of the legendary black stone, the origin of all power and wealth. On multiple servers and channels, players participate in realistic combat, siege warfare, production, trade and other tasks that challenge the limit of standard MMORPG's, all set in an expansive open world with a variety of nearly limitless content.

About YEBIS

YEBIS is the advanced optical effects middleware from Silicon Studio that accurately delivers camera lenses effects such as bokeh, depth of field and glare. YEBIS simulates an actual camera lens to recreate the most realistic and accurate optical effects.

YEBIS is available for the following platforms:

PlayStation®4、PlayStation®3、PlayStation®Vita、Xbox One、Xbox360®、Windows® (DirectX 9/10/11) 、iOS、Android
